

11/2/04

Frank - FYI

Residents near the new Mallard Park Subdivision have started this petition against the detention pond. (Reminder - this is the pond that holds less than 1ft of water; John + Craig Biggar; Nuttome (Lennar) builder). They are still collecting more signatures.

This is a protestation regarding to the so-call holding tank on Jason dr..

David S.

COMMENTS

My family lives right beside the tank and I notice several problems.

1. It has been an breeding grounds for mosquitos because of the corrosion.
2. Every time the water gets real low the posion snakes and snapping turtles comes up to my front door. This becomes a danger to my two kids under the age of 7. If it was only once in awhile that would be okay, but its every time its only a little bit or no water in the holding tank. Besides that I'm afraid that one of the kids in the neighborhood is going to get hurt.
3. We ask one of guys over the project about them cutting the grass. Shawn said that its our responsibility to cut the grass around the tank if we wanted it cut. Now we do not own the land or put the holding tank there. Besides the holding tank is a neighborhood eye sore.

SOME OF THE COMMENTS OF SOLUTIONS

Place some rocks in it to help with the corrosion. Or make it hold so much water with a pump to keep the water moving. Maybe stock some fish in it to help the mosquito problem. Grow some grass that don't grow tall or keep it cut.

If you would like to put a protest comment or a solution remark you can do so.

Mark protest as P= and solutions as S=

1. Thera Tucker
2. Bultha M. Conchie
3. Shanna Fitzgerald
4. Gage M. Schmidt ? = we was promise something nice not a mud hole.
5. Chris Vande
6. Teese Vaneh - Please finish the job, don't leave it half done.
7. Robert Hamanstra - Health hazard
8. Glynda Stiles
9. John Stiles
